PROPHYLAXIS PASTE
With NovaMin®

Caution: United States Federal law restricts this device for sale by, or on the order of, a licensed dental professional.

These instructions cover all NUPRO extra care Prophylaxis Paste Flavors/Grits.

NUPRO extra care is a premium Prophylaxis Paste containing NovaMin®, a calcium sodium phosphosilicate. The dye-free formulations are available in the following two grits to gently remove dental plaque and stains.

Polish Grit (fine-medium grit)
Ideal for younger patients and prophylactic procedures requiring minimal tooth abrasion.

Stain Removal Grit (medium-coarse grit)
Suitable for most cleaning procedures where a high level of polish is desired for stain removal.

INDICATIONS FOR USE
NUPRO® extra care Prophylaxis Paste with NovaMin® is intended for cleaning and polishing procedures, prior to and after scaling and root planing as part of a professionally administered dental prophylaxis treatment. Secondly, NUPRO® extra care Prophylaxis Paste with NovaMin® can be used for the immediate relief of tooth sensitivity and for last sensitivity relief for up to 4 weeks (28 days) after just one application.

CONTRAINDICATIONS
• Not for use on patients with a known allergy to any of the components.
• Not for use on restorations. Use NUPRO® Shimmer® Polishing Paste for Restorations.

INGREDIENTS
Medicinal Ingredients: 2.72% Sodium Fluoride (1.23% fluoride ion) (for fluoride containing pastes only)
Non-Medicinal Ingredients (for all pastes): Glycerin, Pumice, Calcium Sodium Phosphosilicate (NovaMin®), Sodium Silicate, Titanium Dioxide, Methyl Salicylate, Purified Water, Sodium Carboxymethylcellulose, Sodium Saccharin, Flavor.

WARNINGS
• For fluoride containing paste, excessive ingestion of fluoride can cause nausea. Therefore, pastes should be expectorated and not swallowed.
• May cause eye irritation upon contact. If contact with eyes occur, immediately flush eyes with copious quantities of water for 15 minutes. Seek medical attention if irritation or discomfort persists.
• Avoid repeated skin contact since repeated chronic exposure may cause dermatitis. If accidental contact with skin occurs, wash thoroughly with soap and water.
• Ingestion of Prophylaxis Paste may cause salivation, nausea, vomiting. Ingestion of large quantities may cause abdominal pain, weakness, tremor, spasm or convulsions. Death can result from respiratory paralysis. If accidental ingestion of copious amounts occurs, call a physician at once. Immediately give copious quantities of milk, or water, if milk is not available.
• Unit dose cups contain enough Prophylaxis Paste for a single procedure. Each cup is intended to be used once for a single patient. Reuse of unfinished cup for another patient could result in cross-contamination.

ENGLISH

PRECAUTIONS
• Prophylaxis pastes containing fluoride are not considered a replacement for other forms of fluoride therapy.
• Prophylaxis Pastes are to be used only by individuals professionally trained to perform a dental prophylaxis.
• During use, wear protective glasses and gloves.

ADVERSE REACTIONS
For fluoride containing paste, the following adverse reactions are possible in individuals hypersensitive to fluoride: eczema, atopic dermatitis, urticaria, gastric distress, headache and weakness.

STEP-BY-STEP INSTRUCTIONS
Unit dose cups contain enough Prophylaxis Paste for a single procedure. Each cup is intended to be used once for a single patient. Reuse of unfinished cup for another patient could result in cross-contamination.

Using a disposable prophylactic such as NUPRO® revolv® Disposable Prophylaxis Angle or a conventional metal prophylaxis angle, fill the cup by pressing the face of the cup into the disposable prophy angle to avoid overheating of the tooth surface. Saliva evacuation is recommended to avoid excessive dilution and swallowing of the paste.

Rinse full mouth with water spray. For any white residue remaining following normal rinsing, have the patient swish water or mouth rinse around the gingiva. Polishing prior to scaling is another option to reduce the white residue on the gingiva.

STORAGE
Do not store above 25°C (77°F). Keep out of direct sunlight.

Expiration Date and Lot Number
The ReOrder Number, Lot Number, and Expiration Date should be referenced in all correspondence requiring identification of the product. Do not use after expiration date.
